

January 2020

Dear Mayfield Residents,

With time comes change, and at this time we wish to express our sincere gratitude to Catherine! She has reached retirement, what an accomplishment! Catherine has dedicated so much of her life to the town of Mayfield over the last thirty years--all the while being a wife, mother, grandmother, and helping students with disabilities in her job with the school district. Catherine has done so much over the last three decades to keep Mayfield running right, getting along, and meeting our obligations--she deserves such a huge thanks from each of us who live here in Mayfield! She and her husband Kendall have basically been on call for the town for decades and now it is our turn to let Catherine and Kendall know how much we appreciate all their tireless efforts on our behalf. Mayfield is so lucky to have Amanda Bennett to be taking over Catherine's role as town recorder going forward, but please give Catherine a heartfelt thanks when you see her! THANKS CATHERINE FOR ALL YOU HAVE DONE FOR ALL OF US HERE IN MAYFIELD!!!

**New office hours for Mayfield Town will be Monday-Thursday 8:30 am- 4:30 pm.
Excluding Holidays.**

Please take note of the following free class for you:

I have arranged to teach a one hour class on emergency preparedness, on the fourth Thursday of each month at 7:00 pm at the town hall, beginning on January 23, 2020. All classes are free and everyone is welcome. If you have questions, please feel free to call me at 801-450-8399.

If people are given correct information and experience, they will have the knowledge to care for themselves and their families during crises. Because I feel so strongly about these things, I would like to share the information that I have learned over the years. I have spent many years researching and learning about preparedness and feel this information is vital in preventing the illness, injury, suffering and even death that often follow natural disasters and other emergencies. People must know about sanitation, water and food storage, and physical and emotional wellness. Other important topics that would be covered are alternative cooking methods, financial preparedness, documentation of your home inventory, what to store and how to store it properly so it will last as long as possible. There are also five things that people must know about protecting the investment of food storage and I would cover those as well.

Thank you, Myrna Fjeldsted
